Bordeaux celebrates the International Year of Crystallography

P. Rosa¹, A. Dautant¹, P. Guionneau¹

¹Association Bordelaise de Cristallographie, Bordeaux, France

The Association Bordelaise de Cristallographie (ABC) is a local crystallographic society founded in the tradition of the Laboratoire de Cristallographie of Bordeaux which organized the IUCr 15th Congress in 1990. Since 2006, researchers from laboratories all over the campus of the Bordeaux area collaborate and meet annually to exchange on their results and studies using single crystal and powder X-ray diffraction, SAXS/WAXS, etc... covering all disciplinary fields including Chemistry, Biology, Physics, Pharmacy, Archeometry and Geology. In collaboration with CNRS, Université de Bordeaux, the Association Française de Cristallographie (AFC), and CEA, the Muséum d'Histoire Naturelle of Bordeaux and the ABC organizes a series of events to celebrate the UNESCO International Year on Crystallography. This poster will present the events taking place in the Bordeaux region along 2014.
