

Welcome to DECOR--The Database of Educational Crystallographic Online Resources.

Title: DECOR: The Database of Educational Crystallographic Online Resources

Author: Michael J. Zdilla, Temple University

Abstract: A newly released online resource for crystallographic education is presented. The mission of DECOR is to create a free, one-stop-shop for resources for undergraduate or graduate crystallography courses where developers of new courses or instructors of existing courses can go to find resources such as visual aids, homework problems, laboratory experiments, animations, and any other teaching tools to make crystallographic educational accessible to new learners. In addition to presenting the existing resources, the presenter will solicit new contributions to DECOR from the attendees. Future plans for DECOR will be discussed. DECOR may be accessed at <https://decor.cst.temple.edu/>
