

'Individual readers of this journal, and non-profit libraries acting for them, are permitted to make "fair use" of the material in it, such as to copy an article for use in teaching or research. Permission is granted to quote short passages and illustrations from this journal in scientific works with no further formality than the customary acknowledgement of the source. Republication or systematic or multiple reproduction of any material in this journal (including abstracts) is permitted only under licence from the International Union of Crystallography; in addition, the Union may require that permission also be obtained from one of the authors. Enquiries and requests should be addressed to the Executive Secretary, International Union of Crystallography, 13 White Friars, Chester CH1 1NZ, England.'

For these reasons, the Executive Committee of the IUCr has determined that, henceforth, a Transfer of Copyright Agreement must be executed by the author (or other copyright holder) for each contribution, including invited papers, before it can be considered for publication in either *Acta Crystallographica* or *Journal of Applied Crystallography*.<sup>\*</sup> The transfer will become effective only if and when the contribution is accepted for publication. In drawing up this document, the Editors and the Executive Committee have tried to maintain sensitivity to the fact that the copyright situation may differ from country to country, although most countries

<sup>\*</sup> The Transfer of Copyright Agreement may be photocopied from page 157 of *Notes for Authors* in the January 1978 issue of *Acta Crystallographica*, Section A, or copies may be obtained from any of the editors or the Executive Secretary.

do subscribe to international copyright conventions. Further, it is particularly desired that the present rights of the authors should not be restricted in any way. For that reason, the Transfer Agreement retains certain important parts of the copyright with the author.

Anyone wishing further information should contact the Executive Secretary, International Union of Crystallography, 13 White Friars, Chester CH1 1NZ, England.

### *Notes for Authors*

An updated version of *Notes for Authors* has been published recently in *Acta Crystallographica*, Section A [*Acta Cryst.* (1978), A34, 143–157]. Copies of these notes may be obtained from any of the Editors or the Technical Editor.

### **Polarization ratio for X-rays – A survey by the Commission on Crystallographic Apparatus**

The Commission is conducting a survey of measured values of the polarization ratio for crystal-monochromated X-ray beams. A notice summarizing the definition of this ratio and mentioning techniques for its measurement has been published recently in *Acta Crystallographica*, Section A [*Acta Cryst.* (1978), A34, 159–160]. The object of the survey is to establish the range of values observed in practice and all interested scientists are invited to participate.
