

Supper Microgoniometric Arcs

Supper UltraMicro Arcs are priced at US \$410 (list) each and can be supplied stacked for US \$795. Literature is available on request.

Charles Supper Company, Inc., Donald E. Goodwin, VP Marketing, 15 Tech Circle, Natick, MA 01760, USA (e-mail: dgood10710@aol.com).

Books Received

The following books have been received by the Editor. Brief and generally uncritical notices are given of works of marginal crystallographic interest; occasionally, a book of fundamental interest is included under this heading because of difficulty in finding a suitable reviewer without great delay.

J. Appl. Cryst. (1996). **29**, 616

Silicon carbide and related materials 1995. Edited by S. NAKASHIMA, H. MATSUNAMI, S. YOSHIDA and H. HARIMA. Institute of Physics Conference Series, No. 142. Pp. xxv + 1120. Bristol, Institute of Physics Publishing Ltd, 1996. Price £225.00. ISBN 0-7503-0335-2. The Proceedings of the Sixth International Conference on Silicon Carbide and Related Materials, held in Kyoto, Japan, 18–21 September 1995. The volume contains 271 conference papers, including reviews of advances in the field, and the latest research findings.

Defect recognition and image processing in semiconductors 1995. Edited by A. R. MICKELSON. Institute of Physics Conference Series, No. 149. Pp. xii + 369. Bristol: Institute of Physics Publishing Ltd, 1996. Price £110.00. ISBN 0-7503-0372-7. The Proceedings of the Sixth International DRIP Conference, held in Boulder, Colorado, USA, 3–6 December 1995. This volume contains 61 of the 68 presentations offered at the conference.

Growth of crystals. Vol. 20. Edited by E. I. GIVARGIZOV and A. M. MELNIKOVA. Pp. viii + 169. New York: Plenum Publishing Corporation, 1996. Price US \$95.00. ISBN 0-306-18120-7. This most recent volume in a series of translations from the Russian features 14 research papers in the three areas of heterostructure formation (five articles), growth from solutions (four articles) and growth from the melt (five articles). The articles are stated to 'cover a broad spectrum of current research in Russia and Ukraine'.
